- ❖ Cloud – Azure, AWS
- ❖ CRM – MS Dynamics, Salesforce
- ❖ ERP – SAP

Adding value to business... with latest technologies.

Our Process

At Informics Digital, we plan each project with an individual workflow - everything works in a way that is most convenient to you.

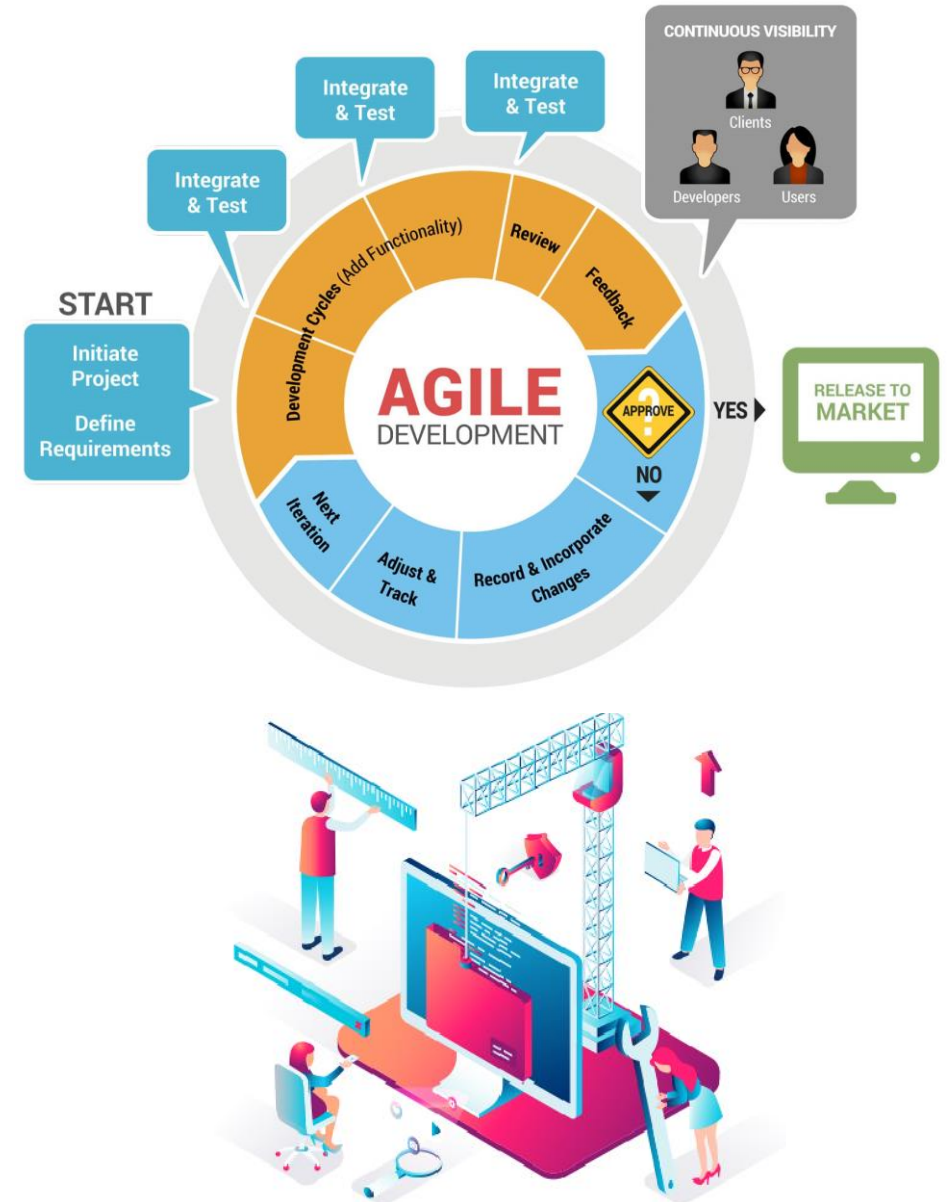

We practice Agile methodology for project delivery. Starting with the product backlog, we follow Scrum based weekly / biweekly sprints to deliver working software at the end of each sprint.

We demonstrate results to you and your stakeholders, so that you can check the progress on a regular basis and make necessary adjustments in a timely and controlled manner.

We do our daily stand-ups and develop features that provide most value for your business and meet your needs.

Each of our sprints ends with retro to make sure we keep improving as we go.

Adding value to business... by adhering to processes.
